EFFICIENT TOOLS THAT MEET YOUR EVERY EXPECTATION.

KYOCERa

THE KEY TO OFFICE PERFORMANCE:
DAY TO DAY PRODUCTIVITY.

EASY TO USE AND BUILT TO LAST

Two simple principles underpin the KM-3050, KM-4050 and KM-5050. The first is that for technology to be useful, it has to be easy to use. The second is that any mechanical device has to cope effortlessly with constant use. Simple to operate and with long-life components, these multifunctionals fulfil both criteria.

Allied to top-level reliability and efficiency, Kyocera system software ensures smooth cross-network co-ordination. Helping you carry out everyday tasks with maximum productivity, you can rely on the KM-3050, KM-4050 and KM-5050 to get things done.

One machine for printing, copying, scanning and faxing – it's natural to be a little apprehensive of a multifunctional. But as with any effective business tool, if it's uncomplicated it straight away becomes an indispensable part of your armoury. Which is where the KM-3050, KM-4050 and KM-5050 come in. Effortlessly simple to operate and helping you through diverse tasks with hard-working dependability, they take your document handling capabilities to a new level.

Double-sided colour scanning
Scan both sides of a document in full colour in just one pass.

User-friendly colour touch-panel
Clear, easy to read, and takes you through every task.

Colour thumbnail viewing
Lets you find documents easily before printing and copying.

PDF direct printing
Print PDFs directly, either from PC or from memory stick.

80GB document box as standard
Massive hard disk memory lets you save documents on the multifunctional itself and output them directly without going through a PC.
Long-life components
Durable components increase longevity and reduce downtime.

SIMPLE OPERATION

The colour touch-panel is the nerve centre of the KM-3050, KM-4050 and KM-5050. A full 8 inches across, its well laid-out controls and colour LCD ensure operation is simplicity itself. Help Keys and a Help Guidance function describe operation procedures and settings, so that you can carry out precisely the task you set out to do. Documents saved on the device's hard disk are shown on the panel as colour thumbnails, allowing you to identify exactly the pages to be printed, copied or faxed.

The colour touch-panel: big, clear and easy to use.

Located just to the right of the colour touch-panel, where it's easily accessible, is a USB port. Plug in a memory stick and PDFs that are stored on it can be printed directly. Convenient, and secure too, since it lowers the risk of documents being left at the device and being seen by a third party.

USB port lets you print directly from memory stick.

NOT JUST COLOUR SCANNING, BUT DOUBLE-SIDED COLOUR SCANNING

The addition of an optional processor lets you scan documents in colour. Not only that, but it lets you scan both sides of an original in just one pass. Double-sided colour scanning adds another level of convenience and flexibility to the workplace.

MULTITASKING MADE EASY

A new Kyocera platform allows multiple jobs to be processed simultaneously. For example, it's possible to print while scanning, or send a fax while copying. It means different workgroups always have the multifunctional at their disposal, with no hanging around waiting for one job to finish so another can begin. The same kind of can-do flexibility is in evidence with the ability to scan to different locations, including e-mail and FTP servers.

You can also save documents, including scans and incoming faxes, in document boxes on the multifunctional's hard drive. These can then be output directly without going through a PC. It's a convenient place to store frequently printed items such as report covers, letterheads and so on.

Documents saved to document boxes on the hard drive can be printed directly.

SECURING YOUR DOCUMENTS

With any multifunctional, data created by copying, printing, scanning and faxing remains on the hard drive until it's overwritten by new, incoming data. However, during the time it stays on the hard drive, there's a risk it can be extracted, posing a security problem. This can be overcome by adding a Data Security Kit, which automatically encrypts data when it's written and erases it as soon as a job ends. Even if the hard drive is stolen, there's no chance of the address book being read, since all the information it contains is also encrypted.

For extra security, you can protect PDFs with a password. You give a PDF a password at the scanning stage, then every time you need to open it, you key in the password again.
1. Set password when scanning.
2. Key in password when PDF needs opening.

DIFFERENT CONFIGURATIONS FOR DIFFERENT REQUIREMENTS

The great advantage of the KM-3050's, KM-4050's and KM-5050's modular design is that many configurations are possible. Two 500-sheet paper cassettes, a 200-sheet manual paper feeder and a duplex unit for double-sided printing and copying come as standard with each model. From then on, it's a matter of setting up the multifunctional to suit your specific needs.
